

DEMONSTRATION ONLY - NOT VALID EVIDENCE

Workforce count scenario

Static rehearsal checkpoint alongside the live forecast

MEMBER GENERAL | Fictional roster only

REFERENCE DEMO-FRC-001 | DEMO DATE 2026-09-25

As-of date	2026-09-25
Horizon / date shift	36 months / +12 months
Roster count	12 fictional members
Baseline / scenario count	3 / 2 members in the window
Measure	Headcount only - no monetary liability

How to present the comparison

Run the live forecast with as-of date 2026-09-25, horizon 36 months and a positive 12-month shift. The untouched seeded roster produces baseline count 3 and scenario count 2, from a total roster of 12.

The shift can move an expected retirement date outside the selected window. It does not remove a member from the roster, approve a policy change or establish statutory entitlement.

This static page is a presenter aid. Use the live server-calculated result and visible settings as the current evidence. It is not an actuarial model, pension-cost estimate or liability forecast.

CHECKPOINT: show the live settings and counts; do not infer pension costs.
