Handover content

The fictional M002 readiness assessment identifies a joining-date discrepancy. The pension source reports 1992-06-01 and the employer source reports 1992-07-01. Both values must remain traceable.

Inspect the appointment evidence and the real case linked to the saved assessment. Obtain any further authoritative evidence needed. Record a reviewer reason before advancing the actual workflow.

This handover is a sample document, not a generated application case or completed review. It has no live case identifier, approval or signature. Uploading it does not resolve a case or update the official pension record.

CHECKPOINT: handover describes a next action; the reviewer controls the case.
